
Strategic Wildfire Prevention Initiative

Community Wildfire Protection Plan Program

E-mail: lgps@ubcm.ca
Mail: 525 Government Street, Victoria, BC, V8V 0A8

2014 Program & Application Guide

1. Introduction

The Strategic Wildfire Prevention Initiative (SWPI) is a suite of funding programs managed through the Provincial Fuel Management Working Group – including the First Nations' Emergency Services Society (FNESS), Ministry of Forests, Lands & Natural Resource Operations and the Union of BC Municipalities (UBCM). Grant administration is provided by UBCM and funding is from the Ministry.

The initiative supports communities to mitigate risk from wildfire in the wildland urban interface.

The wildland urban interface (WUI) is any area where combustible wildland fuels (vegetation) are found adjacent to homes, farm structures, other outbuildings or infrastructure. For the purpose of the SWPI, the WUI is the area within 2 kilometres of a community with a minimum density of 10 structures per square kilometre.

Funding under the Strategic Wildfire Prevention Initiative is available for:

- Development of Community Wildfire Protection Plans (CWPP)
- Development of Fuel Management Prescriptions
- Implementation of Fuel Management Demonstration Projects
- Operational fuel treatment activities

Community Wildfire Protection Plan Program

A CWPP is a document that defines the risk from wildfires in an identified area, identifies measures necessary to mitigate those risks and outlines a plan of action to implement the measures. For details on recommended elements of a CWPP, see Appendix 1.

The CWPP program assists local governments and First Nations to develop CWPPs for areas in the WUI that are at risk from wildfires and provides direction for wildfire threat assessment and mitigation. This guide provides information for local governments (municipalities and regional districts) to apply for funding.

2. Eligible Applicants

All local governments (municipalities and regional districts) are eligible to apply.

First Nations are also able to apply for funding through FNESS. Details about the program for First Nations are available on the FNESS website at www.fness.bc.ca

3. Eligible Projects

In order to qualify for funding, there must be credible evidence of an apparent threat to the community from interface fires. The current Provincial Strategic Threat Analysis (see below) will be used to assist with threat assessment during the approval process.

In addition, to qualify for funding, CWPPs must:

- Be a new project (retroactive funding is not available)
- Assess the threat of wildfire in the WUI
- Cover areas that do not have a CWPP or areas where the CWPP is outdated due to changes in land, forest fuel hazards or other factors
- Be capable of completion by the applicant within one year from the date of grant approval
- For elements of the CWPP that fall under the practice of forestry, be developed by a forest professional that is accredited by the Association of BC Forest Professionals

Updates to existing CWPPs will be considered for funding only in cases where land, forest fuel hazards or other factors have changed.

Please note: Applicants that received funding through the 2004-2010 and/or 2011 SWPI are required to submit any outstanding 2004-2010 and/or 2011 reporting prior to 2014 applications being considered.

4. Provincial Strategic Threat Analysis

The Provincial Strategic Threat Analysis (PSTA) is a collection of datasets that are used together to identify interface areas that may be at risk of wildfire. These datasets are meant to be used at a strategic level and at a coarse resolution suitable to the area of the province of BC. These datasets can be used together to prioritize community wildfire protection planning and to guide mitigation of wildfire in areas identified to be at risk. As much of the data has not been ground-truthed it should only be used as a guide during the CWPP process and will need to be verified or ground-truthed to adequately assess wildfire threat or to prioritize treatments.

The current version of the PSTA was built in 2012 and is available free of charge to approved applicants that will be completing a CWPP.

5. Eligible & Ineligible Costs & Activities

Eligible Costs & Activities

Eligible activities are outlined below. The CWPP program can contribute a maximum of 50% of the cost of eligible activities – to a maximum of \$15,000 - and the remainder (50%) is required to be funded through community contributions.

Eligible costs are direct costs, for the activities approved in the application by the Provincial Fuel Management Working Group, that are properly and reasonably incurred and that are paid by the local government to carry out eligible activities. Eligible costs can only be incurred from the date of application submission until the final report is submitted.

Under the CWPP program, eligible activities must be cost-effective and may include:

- Consultation with the resource district, land manager, other local governments, First Nations (as required by the land manager), or other stakeholders regarding the proposed CWPP. *Please note this activity may take place before the application is submitted provided it is conducted within 12 months of application submission.*
- Preparation of the CWPP, including maps, spatial data, and metadata (See Appendix 1 for recommended CWPP content, Appendix 3 for mapping requirements and Appendix 4 for spatial data requirements)

- Completion of a WUI Wildfire Threat Assessment within the WUI area, including WUI Threat Assessment worksheets
- Updates to existing WUI Wildfire Threat Assessment plots and related spatial data to conform to the current WUI Wildfire Threat Assessment standards (in areas subject to future prescriptions or operational treatments)
- Updated structure mapping and updated fuel typing within the WUI (See Appendix 3 and 4)
- Presentation of the CWPP to the local government Council or Board, tenure holders (if applicable) and resource district and/or land manager. Please note: it is expected that all CWPPs and CWPP updates will be presented to the local government Council or Board.
- Amendments to Official Community Plans and/or land use, engineering and public works bylaws and policies that are specific to the CWPP
- Staff and contractor costs directly related to the development of the CWPP
- Local government administration costs directly related to the development of the CWPP
- Public information directly related to the development of the CWPP

Local FireSmart Activities as Part of the Community Contribution

Starting in 2014, the following FireSmart activities - undertaken directly by the local government - can be claimed as part of the approved applicant's community contribution to the development of a CWPP or CWPP update:

Community involvement and public education activities, including:

- Establishing a FireSmart Board
- Conducting Community assessments
- Organising and holding a FireSmart day

Eligible FireSmart activities can account for no more than 25% of the total project cost (to a maximum of 25% of \$30,000 of eligible project costs). In addition, eligible FireSmart activities may take place before the application is submitted provided they are undertaken within 12 months of application submission. Applicants will be required to provide certified financial information for all FireSmart activities, in both the application form and final report form.

Ineligible Costs & Activities

Any activity that is not outlined above or is not directly connected to activities approved in the application by the Provincial Fuel Management Working Group is not eligible for grant funding or as the community contribution. This includes:

- | | |
|---|--|
| <ul style="list-style-type: none"> • Development of funding application package • Reproduction of maps available from other sources (e.g. BCGW, etc.) • Reproduction or duplication of existing data available from other sources • Emergency plans or related activities • Prescriptions or operational projects • On-going public information • Local fire department training • Assessments for private land | <ul style="list-style-type: none"> • CWPPs for land outside of 2 km of the local government boundary • Assessments for purposes other than fuel treatment (e.g. building of recreational trails, etc.) • Staff training costs, including safety and first-aid training • Publication reviews or research • Purchase of machinery and equipment • Work undertaken by the Ministry of Forests, Lands & Natural Resource Operations |
|---|--|

6. Grant Maximum

Eligible activities and costs are outlined in Section 4. The CWPP program can contribute a maximum of 50% of the cost of eligible activities – to a maximum of \$15,000 - and the remainder (50%) is required to be funded through community contributions.

Applications from regional districts, or from multiple local governments, that include multiple communities are acceptable. In these cases, funding in excess of \$15,000 may be considered.

In order to ensure transparency and accountability in the expenditure of public funds, all other grant contributions for eligible portions of the project must be declared and, depending on the total value, may decrease the value of the grant. See Appendix 2 for important information on community contributions and other grant contributions.

7. Application Requirements & Process

Application Deadlines

Funding permitting, applications can be submitted to UBCM at any time; however funding decisions will only be made three times per year:

- March 2014 – for all eligible applications submitted by January 31, 2014 (funding permitting)
- June 2014 – for all eligible applications submitted by April 25, 2014 (funding permitting)
- November 2014 – for all eligible applications submitted by Oct. 3, 2014 (funding permitting)

The Fuel Management Information System (FMIS) is not available for projects approved after 2010. Instead, local governments should submit complete applications directly to UBCM. First Nations should submit complete applications directly to FNESS.

Required Application Contents

- Completed Application Form.
- Council or Board resolution indicating support for the current proposed activities and willingness to provide overall grant management

Please note: Applicants that received funding through the 2004-2010 and/or 2011 SWPI are required to submit any outstanding 2004-2010 and/or 2011 reporting prior to 2014 applications being considered.

Submission of Applications

Applications should be submitted as Word or PDF files and can be e-mailed directly to Local Government Program Services (UBCM). If you choose to submit your application by e-mail, hard copies do not need to follow.

E-mail: lgps@ubcm.ca

Mail: 525 Government Street, Victoria, BC, V8V 0A8

Review of Applications

UBCM will perform a preliminary review of all applications to ensure the required application elements (identified above) have been submitted and to ensure that basic eligibility criteria have been met.

Following this, all eligible applications will be reviewed and scored by Fuel Management Specialists. Scoring considerations and criteria include the following:

- Demonstrated wildfire threat (including current Provincial Strategic Threat Analysis)
- Status of CWPP, i.e. no CWPP, outdated CWPP or current CWPP
- Community planning and activities identified by FireSmart Canada:

- Land use policies, development approval processes and development standards that protect the WUI
- Other plans and bylaws that consider open burning, access for emergency vehicles, access to water supply and suppression equipment, fire-resistive landscaping, or other wildfire issues
- Community involvement and public education (including FireSmart committee, community assessment, FireSmart day and FireSmart Canada Community Recognition)
- Collaboration with neighbouring First Nations and local governments, fire departments, Wildfire Management Branch, and local industry
- Consultation with resource district and/or land manager

Point values and weighting have been established within each of these scoring criteria. Only those applications that meet a minimum threshold point value will be considered for funding.

Following technical review, applications that meet the minimum point value threshold will be considered by the Evaluation Committee and funding decisions will be made on a provincial priority basis.

8. Grant Management & Applicant Responsibilities

Please note that grants are awarded to local governments only and, as such, the local government is responsible for completion of the project as approved and for meeting reporting requirements.

Local governments are also responsible for proper fiscal management, including maintaining acceptable accounting records for the project. The Provincial Fuel Management Working Group reserves the right to audit these records.

Notice of Funding Decision

All applicants will receive written notice of funding decisions, which will include the terms and conditions of any grant that is awarded.

Please note that in cases where revisions are required to an application, or an application has been approved in principle only, the applicant has one year from the date of the written notice of the status of the application to complete the application requirements. Applications that are not completed within one year will be closed.

Post Approval Meeting

As a condition of grant approval, all approved applicants are required to meet with the local Wildfire Management Branch Fuel Management Specialist, or designate, to discuss the proposed project prior to commencing work.

Progress Payments

Grants under the CWPP program are paid at the completion of the project and only when the final report requirements have been met. To request a progress payment, approved applicants are required to submit:

- Description of activities completed to date
- Description of funds expended to date
- Written rationale for receiving a progress payment

Changes to Approved Projects

Approved grants are specific to the project as identified in the application, and grant funds are not transferable to other projects. Approval from Provincial Fuel Management Working Group will be required for any significant variation from the approved project. To propose changes to an approved project, approved applicants are required to submit:

- Description of the new or revised activities and area (if applicable)
- Description of new or revised expenditures
- Written rationale for changes to activities and/or expenditures

Please note that the applicant may be required to submit an updated, signed application form and an updated Council/Board resolution.

Extensions to Project End Date

All approved activities are required to be completed within 1 year of approval and all extensions beyond this date must be requested in writing and be approved by the Provincial Fuel Management Working Group.

Consultation with Resource Districts and/or Land Manager

Applicants are strongly encouraged to consult with local resource district staff and/or the local land manager before and during the CWPP development process and when a draft CWPP is completed.

The SWPI provides funding for the development of CWPPs and fuel management prescriptions, and for communities to undertake operational fuel treatments. However, applicants are required by provincial legislation to apply to the local resource district office (or other agencies) for all authorizations to cut and/or remove trees on Crown Land.

Based on this, it is strongly recommended that applicants work closely with the local resource districts to ensure that CWPPs and prescriptions are developed in a manner that will enable the applicant to obtain the necessary approvals when they are ready to advance to operational treatments.

9. Final Report Requirements & Process

Required Final Report Contents

Applicants are required to submit **one** electronic copy of the complete final report (with all supporting documents) and **two** hardcopies of the complete final report (with all supporting documents).

Final Reports must include the following:

- Completed Final Report Form, including signatures by the Registered Forest Professional and local government
- Copy of the completed CWPP, including all applicable appendices, documents, maps and supplementary information (See Appendix 1)
- Georeferenced PDF maps (See Appendix 3)
- Spatial data, metadata, and methodology relating to the project (See Appendix 4)

Submission of Final Reports

Final reports should be submitted directly to Local Government Program Services (UBCM):

E-mail: lgps@ubcm.ca

Mail: 525 Government Street, Victoria, BC, V8V 0A8

Review of Final Reports

UBCM will perform a preliminary review of all final reports to ensure the required report elements (identified above) have been submitted.

Following this, all complete final reports will be subject to three approval processes:

- Administrative approval – To ensure expenditures align with the approved budget, review certified costs (including other grant contributions and project revenue) and calculate the total eligible grant
- Technical approval – To ensure the completed project achieved the intent of the approved application and meets the requirements for funding identified in the 2014 CWPP Program & Application Guide
- Spatial data approval – To ensure the completed spatial data meets the requirements for spatial data identified in the 2014 CWPP Program & Application Guide

Final grant payment will not be approved until administrative, technical and spatial data approvals are complete.

10. Additional Information

- For more information about the funding program, please visit www.ubcm.ca or contact Local Government Program Services at UBCM at (250) 356-5134 or lgps@ubcm.ca
- The current *Wildland Urban Interface Wildfire Threat Assessments* guide and worksheet is available on the UBCM website (www.ubcm.ca)
- FireSmart Canada provides resources for home and private land owners, industry and governments to lessen the effects of wildfire. For more information and to learn about the FireSmart Community Recognition Program, visit www.firesmartcanada.ca
- Information on resource districts can be found on the Ministry of Forest, Lands & Natural Resource Operations website at: www.for.gov.bc.ca/mof/regdis.htm
- The Association of BC Forest Professionals provides multiple documents regarding the roles and responsibilities of forest professional that may be helpful when selecting a consultant or contractor with whom to work with. Visit www.abcfp.ca/regulating_the_profession/guidelines.asp for more information

Appendix 1: Completing a Community Wildfire Protection Plan

CWPPs assess the risk of wildfire in the interface and recommend mitigation activities to improve community safety. With this information in hand, communities can make planning decisions related to issues such as location of new housing, subdivision and other by-laws, and road access. CWPPs also provide key information for homeowners to encourage FireSmart principles on private lands.

Who Should be Involved

Forest professionals play a key role in fuel management in BC - such as the development of CWPPs. In particular, forest professionals accredited by the Association of BC Forest Professionals (ABC FP) who possess a sound understanding of both fire behaviour and resource management are invaluable in planning for and achieving fuel management objectives.

To qualify for SWPI funding, the elements of the CWPP that fall under the practice of forestry must be developed by a forest professional that is accredited by the ABCFP. The forest professional should have a thorough understanding of fire behaviour, fire suppression tactics in the WUI and the related legislation and regulations. Other valuable knowledge for developing a CWPP is an understanding of the FireSmart program, development bylaws, forestry harvesting and fuel management treatment techniques.

Wildfire Management Branch Fuel Management Specialists and/or Fire Zone staff, local fire officials, local resource districts and land managers, and the First Nations' Emergency Services Society are also valuable resources and can be asked to participate in developing a CWPP.

Consultation with Resource Districts and/or Land Manager

Applicants are strongly encouraged to consult with local resource district staff and/or the local land manager before or during the CWPP development process and when a draft CWPP is completed.

The SWPI provides funding for the development of CWPPs and fuel management prescriptions, and for communities to undertake operational fuel treatments. However, applicants are required by provincial legislation to apply to the local resource district office (or other agencies) for all authorizations to cut and/or remove trees on Crown Land.

Based on this, it is strongly recommended that applicants work closely with the local resource districts to ensure that CWPPs developed in a manner that will help the applicant to obtain the necessary approvals when they are ready to advance to operational treatments.

Recommended Content for CWPPs

To qualify for SWPI funding, the elements of the CWPP that fall under the practice of forestry must be developed by a forest professional that is accredited by the ABCFP and the CWPP should include the following elements. Please note that the examples provided are for illustrative purposes only.

Introduction & Community Information

1. CWPP Goals and Objectives

- Goals and objectives of the plan
- General values of the community related to local forestland

2. Community Description

- Description of the local government, including approximate number of homes and developments, population, size in hectares of each community or neighbourhood
- Past forest management or wildfire threat reduction work or programs
- General description of forested areas in and around the community

- Description of road access within the community, including identification of year-round access and seasonal limitations
- Water supply and water bodies in and around the community
- Location of critical infrastructure

Forest, Fuel & Past Wildfire Information

3. Biogeoclimatic Information

- Local biogeoclimatic zones
- Background on typical local wildfire impacts

Important Forest Health Issues

- Discussion of the local forest health, including historical wind throws or beetle events that have shaped the forest in the area

4. Wildfire Behaviour & WUI Wildfire Threat Assessment

- Summary of local fuel types within and around the community, using the Field Guide to the Canadian Forest Fire Behaviour Prediction System (Special Report 11).
- Summary of expected fire behaviour characteristics, using the Field Guide to the Canadian Forest Fire Behaviour Prediction System (Special Report 11)
- Summary of WUI Wildfire Threat Assessment, methodology, and Wildfire Behaviour Threat Class and WUI Threat Class determination within and around the community, using the current WUI Wildfire Threat Assessment Guide and worksheets.

5. Local Wildfire History/Starts and Fire Weather

- Summary of local fire starts, causes and large fire history
- Analysis of the local fire weather data, including an overall indication of wildfire exposure and risk that wildfires pose to the community

Local Issues, Values & Support

6. Resource Issues and Operational Constraints

- Local resource and environmental values and those identified in higher-level plans.
- General discussion of operational constraints that will limit the ability to complete fuel management activities, such as access, soil conditions, topography, land ownership and other local issues

7. Cultural Heritage Values Overview

- Summary of the cultural heritage values identified in the local area, as identified in readily available resources. If additional work is required before treatments can be implemented, this can be completed during the development of the fuel management prescription.

8. Community Support

- Indication of the level of support for fuel management work found within the community. This can be collected from a public meeting(s), board or council resolutions, questionnaires or interviews with key individuals.

9. Key Contact and Partnership List

- List of community agencies and partners who may be required to participate in fuel management work

Existing Plans and Bylaws

10.Higher Level Plans

- Review of higher-level plans in place that may conflict with or enhance the wildfire protection needs of the community. These could include Forest Stewardship Plans, Integrated Resource Management Plans, Fire Management plans and others.

11.Relevant Legislation and Local Government Bylaws

- Review of relevant legislation and review and/or development of local government by-laws

Recommendations

12.Wildfire Threat Reduction Options

- Comprehensive list of recommendations, or actions items, which the local government can act upon to continue their fuel management efforts. These items should lead to funding requests, demonstration projects or operational treatments, other agency involvement and other activities that will move the CWPP forward.
- Other options available for wildfire threat reduction, such as fire-resistive landscaping

13.List of Priority Treatment Areas

- Recommended and prioritized future fuel management activities including areas where harvesting may be an option, and a maintenance schedule
- Treatment units should be listed in order of priority for treatment, with some justification for the selection order. This can be in the form of a list of criteria such as protection of life and property, protection of commercial property, etc. The numerical score from the Wildfire Threat Rating form should also be included.
- May include demonstration projects

14.FireSmart

- Discussion of relevant FireSmart principles

Supplementary Information

15. Threat Assessment

- Prepared per the current WUI Wildfire Threat Assessments guide, including analysis of threat to the community, threat assessment plots, threat assessment worksheets, and photos labelled with photo number and cardinality.
- Threat plots must be done to a density and standard as outlined in Section 3.2 of the current WUI Wildfire Threat Assessment Guide. One new plot (or updated plot, if done to a previous standard) must exist in every area considered for a prescription of operational treatment.

16. Georeferenced PDF Maps & Spatial Data

- Specific map and spatial data submissions are required to be submitted and must meet the standards, content and format outlined in Appendix 3 and 4 of the CWPP Program & Application Guide. Sample map and spatial data submissions are available for reference.

17. Photos of Threat Plot Locations & Sample Fuel Types

- A minimum of one photo per threat plot which is representative of the threat assessment

Appendix 2: Community Contributions & Other Grants

Eligible activities and costs are outlined in Section 4. The CWPP program can contribute a maximum of 50% of the cost of eligible activities – to a maximum of \$15,000 - and the remainder (50%) is required to be funded through community contributions.

The required community contribution for a project must be directly related to activities approved in the application by the Provincial Fuel Management Working Group and can be funded from a number of sources, including:

- Cash contribution from local government (e.g. general revenue or reserve funds)
- In-kind contribution from local government, directly related to activities approved in the application by the Provincial Fuel Management Working Group, including:
 - Staff time directly related to the development of a CWPP (e.g. supervision and travel)
 - Use of local government meeting space or other resources
 - Local government administration of the project and grant funding
- Cash or other contributions from the community (e.g. volunteer labour or use of equipment, cash donation to the project)
- Other grant funding (*see below*)

Community contributions are eligible from the date of application submission until the final report is submitted.

In order to ensure transparency and accountability in the expenditure of public funds, all other grant contributions for eligible portions of the project must be declared on the Final Report Form.

Other Grant Contributions

Funds from other agencies and/or grant programs can constitute all or part of the community contribution (except funds from the Ministry of Forest, Lands and Natural Resource Operations which are not eligible as a community contribution).

However, it is important to note that other grant programs may fund some activities that are not eligible under the CWPP program. Therefore, when accounting for project costs covered by other grant programs, only those activities that are outlined in Section 4 can be included.

Documentation must be available to demonstrate how actual costs from other grant contributions are accounted for. For example, labour costs must include information on the number of hours worked, the hourly rate, and the eligible activity that was undertaken (e.g. 5 hours at \$18/hr. for consultation).

Under no circumstances will the SWPI grant result in payment of more than 100% of the eligible project cost. In cases where eligible portions of other grant funding - combined with the maximum available SWPI grant - are more than 100% of the project cost, the value of the excess funding will be deducted from the SWPI grant.

Eligible project cost of \$20,000 Max. UBCM 50% = \$10,000
Other grants totaling \$12,000 Excess funding = \$2,000
50% of project cost is \$10,000 UBCM Grant = \$8,000

Appendix 3: Full-Size Map Requirements (Final Report)

Applicants are required to submit large format georeferenced PDF maps that clearly represent (at a suitable scale) all of the features being submitted in the spatial datasets and referred to in the final report. The minimum content and maps required for CWPPs are:

- CWPP Overview: CWPP boundary with updated CWPP wildland urban interface (WUI) area, prioritized proposed treatment areas, land ownership, relevant tenure areas, values and other boundary information (municipal, provincial, federal, fire protection areas).
- CWPP Wildfire Threat: CWPP Boundary, Wildfire Behaviour Threat Class, WUI Threat Class (if applicable), Threat Class plots, outline of proposed treatment areas, any previously completed treatments. Threat Class plots must be labelled with the PLOT_NUMBER. Previously completed treatments must be labelled with the treatment year. Hectares of each Wildfire Behaviour and WUI Threat Classes must be stated on the map.
- PSTA, Fire History, Critical Infrastructure: CWPP Boundary, PSTA WUI, updated CWPP WUI, Weather Stations, spotting and structures data, as well as any additional structures compiled as part of this project, and fire history for the last 30 years. Critical infrastructure, other than what is already contained in the structure layer, should also be shown on the map.
- PSTA Fuel Types: CWPP boundary, Updated CWPP WUI, BC Provincial fuel type layer, Mountain Pine Beetle areas, and biogeoclimatic zones. Hectares of each fuel type within the updated CWPP WUI must be stated on the map.
- CWPP Fuel Types: CWPP boundary, Updated CWPP WUI, Updated CWPP fuel type layer, fuel type photo locations, Mountain Pine Beetle areas, and biogeoclimatic zones. Hectares of each CWPP fuel type within the updated CWPP WUI must be stated on the map.

Please note that maps must contain:

- Descriptive title
- Scale (as text or scale bar)
- North arrow
- Legend
- CWPP and GIS consultant company name
- Local government name or First Nation band number
- Date.

The map should also include reference data such as roads, railways, transmission lines, pipelines, water bodies and rivers/creeks. PDF maps should be compressed to reduce unnecessary large file sizes.

Appendix 4: Spatial Data Requirements (Final Report)

Spatial data must be submitted as part of the final report for all SWPI funded projects. *The Province of BC uses ArcGIS 10 and all spatial data submissions must be compatible with ArcGIS 10 or lower.*

Spatial data must conform to the following general formats, naming conventions and standards.

1. Data Format and Naming Conventions: Data must be submitted in a File Geodatabase (FGDB) format and must conform to the conventions for feature dataset names, feature class names, attribute names, and attribute values as identified in the individual project sections. It is strongly recommended that you use the template FGDB in order to facilitate meeting this requirement.

FGDB names must adhere to the following naming standard:

<Local Government/First Nation Band Number>_<ProjectTypeAndDescription>

For example: PrinceGeorge_CWPPNorthPG.gdb

FN699_CWPPNorthPG.gdb

2. Projection: The projection standard is PCS Albers Projection, with parameters of:

Central meridian: -126.0° (126°00'00" West longitude)
Latitude of projection origin: 45.0 (45°00'00 North latitude)
First standard parallel: 50.0° (50°00'00" North latitude)
Second standard parallel: 58.5° (58°30'00" North latitude)
False easting: 1000000.0 (one million metres)
False northing: 0.0
Datum: NAD83, based on the GRS80 ellipsoid.

3. Data Quality: Submitted data must meet general data quality guidelines to ensure corporate data quality standards are met. Data with slivers, gaps between adjacent polygons, and geometry errors will not be accepted.

4. Metadata: Metadata must be provided for all additional spatial layers, referenced in the project deliverables, which are not defined in this program guide. The metadata standard is FGDC and is required to be submitted in .xml format. Metadata must document the following:

- a. A description of what each dataset represents for all datasets provided in addition to what is outlined in the individual project sections.
- b. A description of each attribute and the codes/values used to populate it for all attributes provided in addition to what is outlined in the individual project sections.
- c. For resultant datasets, metadata must also include the methodology and source data used in the creation of the resultant, the date of creation, and contact details for the person who created it.

5. Submission: The method for spatial data submission is a file geodatabase (FGDB) compressed into a zip file.

Please note: Spatial data submissions will be evaluated against these criteria. The final report and payment of grant funding will not be approved until all of these criteria are met.

Specific Submission Requirements by Project Type - Community Wildfire Protection Plan

Feature Layer Name	Feature Layer Description	Mandatory Attributes	Attribute Description	Attribute Details (Data type, length)
AOI	CWPP area of interest (should cover the WUI area)	DATA_COLLECTION_DATE	Date spatial data was collected	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
		AREAHA	Area in hectares	Double
FIRE_THREAT	Dataset indicating area and threat class as described in current Threat Rating Guide	FIRE_BEHAVIOUR_THREAT_CLASS	Wildfire behaviour threat class based on definitions in current Threat Rating Guide. See Table 3	Text, 10
		WUI_THREAT_CLASS	WUI threat class based on the definitions in of current Threat Rating Guide. See Table 4	Text, 10
		DATA_COLLECTION_DATE	Date spatial data was collected	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
		AREAHA	Area in hectares	Double
FUEL_TYPE	Fuel Type	FUEL_TYPE	Fuel Type. See Table 6	Text, 15
		CROWN_BASE_HEIGHT	Crown base (CBH) height for C-6 Fuel type	Short integer
		PERCENT_CONIFER	Percent conifer (PC) for M-1/M-2 Fuel types	Short integer
		PERCENT_HARDWOOD	Percent hardwood (PH) composition for M-1/M-2 Fuel types	Short integer
		PERCENT_DEAD	Percent dead fir (PDF) for M-3/M-4 Fuel Types	Short integer
		DEGREE_OF_CURING	Degree of curing for O-1a/O-1b fuel types	Short integer
		DATA_COLLECTION_DATE	Date the spatial data was collected	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding (ex. SWPI). See Table 2	Text, 30
		AREAHA	Area in hectares	Double
PROPOSED_TREATMENT	Proposed gross treatment area	PRIORITY	Priority of proposed treatment unit. See Table 5	Text, 10
		DATA_COLLECTION_DATE	Date spatial data was collected	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
		AREAHA	Area in hectares	Double

Feature Layer Name	Feature Layer Description	Mandatory Attributes	Attribute Description	Attribute Details (Data type, length)
WILDLAND_URBAN_INTERFACE	Areas within 2 km of a interface density of 10 structures per square km	WUI_CWPP	Qualifier to indicate whether area is within 2 km of a interface density of 10 structures per square km. See Table 9	Text, 5
		DATA_COLLECTION_DATE	Date spatial data was collected	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
THREAT_PLOT	Ground truthed threat plot locations to confirm fire threat	PLOT_NUMBER	Plot number corresponding to Wildfire Threat Worksheet	Text, 7
		PHOTO_REFERENCE	Photo numbers and cardinality for all photos taken when completing Wildfire Threat Worksheet	Text, 100
		FIRE_BEHAVIOUR_THREAT_SCORE	Wildfire behaviour threat score (from WUI Wildfire Threat Worksheet)	Short integer
		FIRE_BEHAVIOUR_THREAT_CLASS	Wildfire behaviour threat class based on definitions in current Threat Rating Guide. See Table 3	Text, 10
		WUI_THREAT_SCORE	WUI threat score (from WUI Wildfire Threat Worksheet)	Short integer
		WUI_THREAT_CLASS	WUI threat class based on definitions in current Threat Rating Guide. See Table 4	Text, 10
		DATA_COLLECTION_DATE	Date spatial data was collected.	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
PHOTO_LOCATION	Photo locations for sample fuel type photos	PHOTO_REFERENCE	Photo numbers for all sample fuel type photos taken at this location.	Text, 100
		DATA_COLLECTION_DATE	Date spatial data was collected.	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30
STRUCTURES	Structures within the CWPP boundary and outside the urban density area	STRUCTURE_TYPE	Type of structure (ex. house, church, gas station). See Table 7	Text, 30
		CRITICAL_INFRASTRUCTURE	Qualifier to indicate if structure is considered critical infrastructure. See Table 8	Text, 5
		DATA_COLLECTION_DATE	Date spatial data was collected.	Date (DD/MM/YYYY)
		DATA_COLLECTION_METHOD	Method of spatial data collection (ex. GPS, digitized, etc.). See Table 1	Text, 45
		FUNDING_SOURCE	Funding source (ex. SWPI). See Table 2	Text, 30

Additional notes about CWPP submissions:

- All spatial layers in addition to those identified in this guide, that are a key component of the CWPP maps or plan, must be included as part of the spatial submission and must include metadata.
- The CWPP area of interest should cover the updated CWPP WUI area and all proposed treatment areas.
- Fuel types must be validated, and updated if required, for areas within the updated CWPP WUI area.
- Only missing structures within the CWPP boundary and outside the urban density area need to be provided. Missing structures are those that are not already contained within the current PSTA structure layer.
- For **all structures**, the critical infrastructure qualifier must be specified.

Attribute Value Reference Tables

Table 1: Data Collection Method

DATA_COLLECTION_METHOD	DESCRIPTION
differentialGPS	Data was captured with a differential GPS unit, or was post-processed with information received from known reference stations, to improve data accuracy
digitizing	Data was converted from an analog map into a digital format using a digitizing tablet connected to a computer
GISAnalysis	Data was created as a result of a GIS Analysis
nondifferentialGPS	Data was captured with a GPS unit but was not post-processed or was captured with a GPS unit incapable of doing differential GPS
orthoPhotography	Data was delineated from an orthophoto (aerial photography)
Photogrammetric	Data was delineated using photographs or images in stereo pairs
satelliteImagery	Data was delineated from a satellite image
sketchMap	Data was hand sketched, either on an analog map or on-screen
tightChainTraverse	Data was surveyed with a hand compass and chain to create a closed traverse

Table 2: Funding Source

FUNDING_SOURCE	DESCRIPTION
SWPI	Strategic Wildfire Prevention Initiative (administered by the Union of BC Municipalities)
JOP	Job Opportunities Program (Provincial)
NRCAN	Natural Resources Canada (Federal)
AFI	Aboriginal Forestry Initiative (Federal)
CREW	Crew Projects
CAF	Community Adjustment Fund (Federal)
SELF	Self funded by the local government or First Nation
OTHER	Other funding source

Table 3: Wildfire Behaviour Threat Class

FIRE_BEHAVIOUR_THREAT_CLASS	DESCRIPTION
Very Low	These are lakes and water bodies that do not have any forest or grassland fuels. These areas cannot pose a wildfire threat and are not assessed.
Low	This is developed and undeveloped land that will not support significant wildfire spread.
Moderate	This is developed and undeveloped land that will support surface fires only. Homes and structures could be threatened.
High	Landscapes or stands that: <ul style="list-style-type: none"> • are forested with continuous surface fuels that will support regular candling, intermittent crown and/or continuous crown fires; • often include steeper slopes, rough or broken terrain with generally southerly and/or westerly aspects; • can include a high incidence of dead and downed conifers; • are areas where fuel modification does not meet an established standard.
Extreme	Consists of forested land with continuous surface fuels that will support intermittent or continuous crown fires. Polygons may also consist of continuous surface and coniferous crown fuels. The area is often one of steep slopes, difficult terrain and usually a southerly or westerly aspect.

Table 4: Wildland Urban Interface Threat Class

WUI_THREAT_CLASS	DESCRIPTION
N/A	Wildfire behaviour threat class is not high or extreme.
Low	High or extreme wildfire behaviour threat class polygon is sufficiently distant from any developments to not to have a direct impact on the community. The polygon is likely over two kilometers from any developments.
Moderate	High or extreme wildfire behaviour threat class polygon is sufficiently distant away from any developments to not to have a direct impact. The polygon is likely over five hundred meters from any developments.
High	High or extreme wildfire behaviour threat class polygon has the potential to directly impact a community or development. The polygon is within five hundred meters of a community or development(s).
Extreme	High or extreme wildfire behaviour threat class polygon has the potential to directly impact a community or development. The polygon is immediately adjacent to a community or development(s).

Table 5: Proposed Treatment Priority

PRIORITY	DESCRIPTION
Low	Proposed treatment area has a low priority
Moderate	Proposed treatment area has a moderate priority
High	Proposed treatment area has a high priority

Table 6: Fuel Type

FUEL_TYPE	DESCRIPTION
C-1	C-1 Spruce Lichen Woodland
C-2	C-2 Boreal Spruce
C-3	C-3 Mature Jack or Lodgepole Pine
C-4	C-4 Immature Jack, Lodgepole Pine, densely stocked Ponderosa Pine, or Douglas Fir
C-5	C-5 Red and White Pine
C-6	C-6 Conifer Plantation
C-7	C-7 Ponderosa Pine or Douglas Fir
D-1/2	D-1/2 Green or Leafless Aspen or Deciduous shrub
S-1	S-1 Jack or Lodgepole Pine slash
S-2	S-2 White Spruce, Balsam slash
S-3	S-3 Coastal Cedar, Hemlock, Douglas-Fir slash
O-1a/b	O-1a/b Matted or Standing Grass
M-1/2	M-1/2 Green or Leafless Mixedwood
M-3/4	M-3/4 Green or Leafless Dead Balsam Fir / Mixedwood
Non-fuel	Non-fuel
Unclassified	Unclassified
Water	Water

Table 7: Structure Type

STRUCTURE_TYPE	DESCRIPTION
airport	Airport
ambulance	Ambulance
barn	Barn
cabin	Cabin
church	Church
cityHall	City Hall
college	College
communityHall	Community Hall
courtHouse	Court House
dwelling	Single unit dwelling (house, etc.)
ferryTerminal	Ferry Terminal

STRUCTURE_TYPE	DESCRIPTION
fireStation	Fire Station
hospital	Hospital
library	Library
multiUnitDwelling	Multi Unit dwelling (apartment, duplex)
museum	Museum
penitentiary	Penitentiary
policeStation	Police Station
postOffice	Post Office
recreation	Recreational building (ski, curling, arena, rec centre)
school	School
transit	Transit
university	University
unspecifiedBuilding	All other building types

Table 8: Critical Infrastructure

CRITICAL_INFRASTRUCTURE	DESCRIPTION
YES	Yes, the structure is considered critical infrastructure and is important to public health and safety.
NO	No, the structure is not considered critical infrastructure.

Table 9: Wildland Urban Interface

WUI-CWPP	DESCRIPTION
YES	Yes, the area is within 2 Kilometers of an interface density of 10 structures per square kilometre
NO	No, the area is not within 2 Kilometers of an interface density of 10 structures per square kilometre
